2023October30BudgetPresentationFINAL_002 ROTHESAY MEMORANDUM

or and Council 9 MacDonald ber 27, 2023 Operating Budgets

Draft 2024 operating budgets for discussion purposes are presented for your consideration.

Various committees, including two meetings with the Finance Committee, have provided input to the budget amounts with the guidance of senior staff. The draft documents also include the most recent version of the Regional Services Commission budget as well as the proposals received from the fire and police Boards. Capital budgets, including funding sources such as Gas Tax expenditure plans, Reserve allocations, etc. are to be discussed at a future meeting.

Our financial calculations reflect a number of critical assumptions, all of which need to be reviewed including the following:

General Fund

Increase in assessment base - 10.8% - increase has been confirmed

Maintain the base property tax rate of \$1.19 per \$100 of assessed value

Maintain the non-residential tax rate at a multiplier of 170%

In discussing tax rate adjustments there are additional factors to consider in addition to the increase in the assessment base. While there have been relatively large increases the past two years it is unlikely to recur. Recent sales activity, increasing borrowing costs, and other market conditions suggests there could be downward pressure on the real estate market possibly even resulting in a lower future assessment base. The Provincial Government has also indicated there may be assessment freezes or other such measures in the near future. There is a real risk that any tax rate decrease may need to be reversed in future budgets.

"Core" equalization funding has been reduced by \$26,195 and allocated to the Regional Services Commission. This reduction is the second year of a five year plan to reduce the funding received directly by the Town to nil.

No significant change in other revenue areas, ie rent, interest, arena, fields, etc. except the surplus carried forward to revenue has decreased by \$145,000.

General Fund (continued)

Budgets for shared services have been approved in principle resulting in the following expenditures:

Fire protection	\$2.87 million (9.75% increase)
Policing services	\$3.38 million (3.38% increase)

The contract for snowplowing was renewed in October with a significant increase. The annual additional charge is approximately \$360,000.

The contracts for waste disposal includes a fuel escalation adjustment. There has been a significant increase in the cost of diesel which will impact these contracted expenditures. The current estimate (subject to adjustment based upon the monthly cost of fuel) is an increase of approximately \$100,000 for these services.

Payroll costs represent the largest single annual expenditure incurred by the Town. Aggregate payroll costs are in the range of \$5 million or approximately 25% of non-fiscal expenditures. There are several factors to consider when projecting the change in payroll costs for 2023 to 2024, including:

Current collective agreements General rate of inflation Payroll agreements by comparable entities Potential new hires or internal job realignment Retirement of senior staff including recruiting costs Increase in the cost of benefit programs (2024 increase is 11%)

In addition to wage adjustments it is necessary to review staffing levels in various areas. There are a number of vacancies to be filled and ongoing discussions as to the need for additional staff. There are a number of potential retirements of long-term employees necessitating some training overlap in positions. In summary, we expect payroll expenditures to increase at a rate higher than recent history.

Recreation department costs are expected to increase due to the need for additional staff plus the operating costs associated with new properties such as the Wells Recreation building.

General Fund (continued)

We are also subject to general inflationary pressures in many other areas including;

Our insurance broker has advised we should expect a premium increase of 10% to 15% (approximately \$25,000).

Property assessments on Town owned properties has increased an average of 4.5% resulting in an aggregate expenditure of approximately \$160,000.

Our Group Heath insurance provider has indicated an average increase in premiums of 11%

Fleet maintenance costs continue to increase as the age of our fleet increases. We are also impacted by fuel cost increases on internal fleet usage.

Debenture payments are based on known repayment schedules plus an expected debenture related to the fire station renovations. Debt service costs are expected to rise with the increase in interest rates. Also, there are a number of large capital projects planned for future years which will have a longer term impact on financing costs.

"Capital from operating" has increased to reflect expected capital expenditures.

Utility Fund

Proposed increase in water usage fees of 4.3% and sewerage fees of 9.2% (schedule attached)

Proposed based water rate of \$1.29 (from \$1.24) and sewer rate of \$475.00 (from \$435.00)

"Typical" user charge for a resident accessing both water and sewerage is approximately \$1,055.00 annually

"Other revenue" decrease reflects a decrease in connection fees projected

Similar general inflationary pressures exist as in the general fund. Specifically costs to maintain the infrastructure and payroll cost pressure. A preliminary budget schedule has been attached for discussion.

Presentation of wages and benefits are presented as the direct costs on a separate line item rather than including in "overhead". Overhead and direct wages are allocated to water and sewer using a 40/60 split based on the approximate number of equivalent users.

Debenture payments based on known repayment schedules (debenture re Turnbull Court project deferred until 2024).

Capital from Operating increased by \$50,000 to recognize the inflationary increases in the costs of capital projects.

GENERAL OPERATING FUND
